Achieving Fluency in Learning

On the journey to fluency, your depth of understanding increases and your ability to recall becomes automatic and a habit.

Emerging

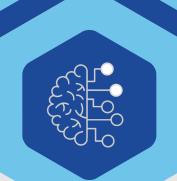

Developing

Secure

Advancing

Excelling

Learning is new and may feel difficult. It's good to make mistakes and is all part of the learning process

Pay careful attention

Ask questions

Carry on trying your best and practice

You are improving all the time, but it may feel difficult to remember everything

You'll still make some mistakes

Keep checking with your teacher

Keep practicing

You are now quite accurate and can practice independently

Keep retrieving your learning so you don't forget it

Think about applying this learning to more difficult questions and connecting it to your other learning

You know this really well now and can remember it easily.

You are almost completely accurate

You can answer quite difficult questions about this learning and connect it to your other learning

You now need to 'overlearn' this, so you achieve pure mastery

You are now fluent in this learning. You are quick and you are accurate.

You can remember it automatically

You see clearly how this learning connects to your other learning

Keep up a retrieval plan and continue to practice so that you don't lose fluency and accuracy
