

**Key Knowledge/Prior Learning KS2/3 and Retrieval and Suggested Starters**

- Use of compass'
- Measuring angles
- Angles in a triangle/quadrilateral/straight line/around a point.
- Indices

**Retrieval and Suggested Starters**

- Practicing the fluency of the above skills.
- Interleaving & problem-solving questions involving the above topics.

**KS4 National Curriculum – what students will be practicing**

- Use the standard ruler and compass constructions (perpendicular bisector of a line segment, constructing a perpendicular to a given line from/at a given point, bisecting a given angle)
- Use these to construct given figures and solve loci problems
- Know that the perpendicular distance from a point to a line is the shortest distance to the line
- Use Pythagoras' theorem to find lengths in right angled triangles.
- Use Pythagoras' theorem to solve problems in 2d.

**Specific Ambitious Knowledge**

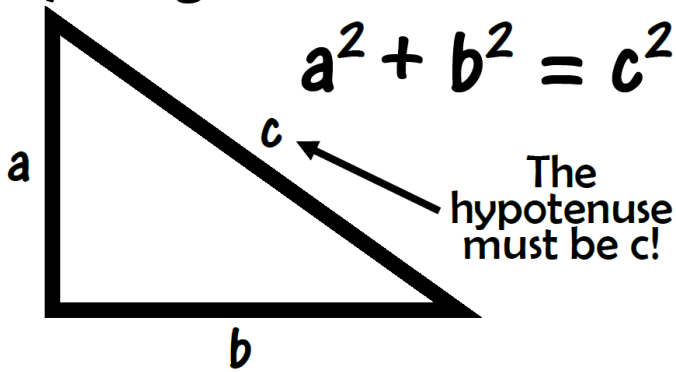

- Use Pythagoras' theorem to solve problems in 2d.
- Solve problems involving loci.
- Interleaving of topics to solve problems.

**Key Vocabulary/Literacy Opportunities**

- Loci
- Perpendicular
- Bisector
- Constructions
- Pythagoras

**Key Formulae/Knowledge:**

# Pythagorean Theorem

## Cross Curricular Links

- Links to other areas of the Maths curriculum.

## Student' Thinking:

- Can you prove that Pythagoras works?
- How can we use it to find other sides?

## Projects/Enrichment/Investigations
